

Committed to Environment | Health | Safety

In line with our management's focus on EHS, we are glad to bring out the inaugural issue of our Safety Bulletin baptized as 'EHS Pledge'.

EHS Pledge will be published as a monthly publication giving a comprehensive coverage on all the good practices, events, reports, testimonials, concepts and even snippets related to Environment, Health and Safety. We would be extremely happy to receive your inputs, experiences and stories on the subject matter of EHS.

The management of ACME Group understands EHS policy as tantamount and essential part of the general duties of employees.

All our employees must strive for zero accident environment and health conditions improvement through their attitude, acting and creative thinking.

ACME conducted CSR Activity at Mahoba

ACME Group has been involved in CSR activities to improve the life of residents in and around the locations of our Solar Plants and also extending hand to other areas of the country to help underprivileged people improve their quality of life.

We carried out the CSR Activity at Bendo, Panwari Mahoba, Uttar Pradesh on 27th December 2016 and distributed Bags and winter clothes in a nearby Government school.

SAFETY GUIDING PRINCIPLES

- We value human life and health above all else and take action accordingly.
- All incidents, injuries and workplace illnesses are preventable.
- We are personally accountable for our own and collectively responsible for each other's safety.
- In meeting our goals for quality, cost and schedule, we will not compromise safety.

ACME organized Health Check-Up Camps

Health and safety of our employees is of utmost importance to us. We attach the same importance to achieving high performance of our employees as we attach to other business activities. This is why, proper attention is given towards the safety, health and welfare of the employees to improve employee morale, reduce absenteeism and enhance productivity, minimize potential of work-related injuries and

illnesses and increase the quality of manufactured products and/ or rendered services.

In this light, we organized Health Check-Up Camps at Gadarpur and Bajpur Sites on 11th and 12th December 2016. All employees and workers at site including nearby villagers were checked by experienced Doctors at the camp.

ACME conducted TBT at various Sites for Safe Work Practices

Tool box talk (TBT) was conducted by a Safety Officer at different sites so that workers work in a safe and secure manner.

An accident happened at site and learnings followed thereafter...

Vehicle No. MP-09 HF 8546 carried the module container at 28.12.2016; 11:50 Am in 12.5x2 MW Solar Project Kailashpur Gadarpur Uttarakhand. The vehicle properly entered from entry gate of Block-1, then took turn to get proper position so that unloading can be done easily. But the driver took wrong turn instead of considering sufficient space for turning.

As per eye witnesses, the helper of that vehicle was not coordinating with driver. So driver reached at the edge of main road and the container lost its balance and fell down.

We have to ensure proper movement of vehicles at sites so that this type of accidents do not happen in future.

Upcoming Event: Road Safety Week (11th - 17th Jan 2017)

We are happy to organize Road Safety Week from 11th Jan 2017 – 17th Jan 2017 at HO and across all sites. All the employees are requested to participate with full zeal and enthusiasm.

ACME Cleantech Solutions Private Limited

'Road Safety - Time for Action'

SAFETY ADVICE!

ELECTRICAL SAFETY

“ Always remember electricity is a good servant but a bad master. ”

What is Electricity?

Electricity is a form of energy. Electricity is the flow of electrons in a closed path.

Why Electrical Safety is important?

Day in and day out, we are exposed to electrical energy in one form or the other. If we do not handle it properly, it will harm human life as well as damage property. Hence, it is important for each one of us to use/handle it carefully.

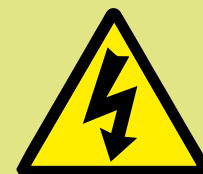

Why are Electrical hazards and its preventive measures?

PRIMARY HAZARDS

- Electric Shock
- Burns
- Fires
- Flash Over
- Radiation
- Explosion
- Fall (Secondary Hazard)

PREVENTIVE METHODS

- De-energisation
- Lock out / tag out
- Safe working distance
- Inspection
- Grounding
- Warning methods
- ELCB
- Safety Equipment
- Safety Procedures
